Re: Chrome Extension Developer — iGaming Product (New Build) — Elevated Leads Limited

Hi there,

I'm excited to apply for the Chrome Extension Developer role at Elevated Leads Limited, as this position aligns perfectly with my expertise and interests. The opportunity to contribute to a new iGaming product is especially intriguing, given my background in the gaming industry and my passion for creating innovative user experiences. I believe my skills in JavaScript and front-end development can significantly impact this project.

As an AI specialist and automation engineer, I have a strong foundation in building intelligent systems. My experience includes working with Sama Kenya and Digital Divide Data, where I evaluated AI models and created multilingual datasets, demonstrating my ability to handle complex data-driven tasks. Additionally, my proficiency in JavaScript, React, and Node.js, coupled with my full-stack development experience, makes me well-equipped to tackle the technical challenges of Chrome Extension development. I have successfully delivered projects involving API integrations and system design, showcasing my problem-solving abilities.

I am confident that my skills and experience will enable me to make valuable contributions to Elevated Leads Limited. I look forward to discussing how my expertise can align with the company's goals.

Sincerely,

Centrine Ong'aria
